REASONS FOR ALLOWANCE

Allowable Subject Matter

1. Claims 1-38 are allowed.
2. The following is an examiner's statement of reasons for allowance: none of the prior art of the record discloses or suggests that a method of determining the presence or absence of one or more nonlinear impairments in a linear medium, comprising: setting one or more pulse transmission parameter values; applying a first sequence of one or more first transmit pulses to the medium for transmission through the medium under the one or more pulse transmission parameter values; receiving from the medium a first sequence of one or more echo signals reflected from impairments in the medium in response to the first sequence of transmit pulses; digitizing the echo signals for each transmit pulse of the first sequence of first transmit pulses to produce a set of digital values for each transmit pulse of the first sequence of first transmit pulses; averaging the digital values for corresponding echo signals of the first sequence of echo signals to produce a first digitized set representing the average of the first sequence of echo signals; changing the one or more pulse transmission parameter values; applying a second sequence of one or more second transmit pulses to the medium for transmission through the medium under the one or more changed pulse transmission parameter values; receiving from the medium a second sequence of one or more echo signals reflected from impairments in the medium in response to the second sequence of transmit pulses; digitizing the echo signals for each transmit pulse of the second sequence of second transmit pulses to produce a set of digital values for each transmit

pulse of the second sequence of second transmit pulses; averaging the digital values for corresponding echo signals of the second sequence of echo signals to produce a second digitized set representing the average of the second sequence of echo signals; combining the first and the second digitized sets to produce a residual digitized set; and examining the residual digitized set for a residual pulse indicating the presence of one or more nonlinear impairments.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Gao et al (U.S. Pat. 7,020,246) disclose a time domain reflected signal measurement using statistical signal processing.

Bostoen et al (U.S. Pat. 7,050,548) disclose localization of customer premises in a local loop based on reflectometry measurements.
